journal of physics

Volume 30, January–June 1988

CONTENTS

Quantum Mechanics

The two-body multipole problem of electrodynamics *Somnath Datta* 1–14

A general law for quantum mechanical joint probabilities: generalisation of the Wigner formula and the collapse postulate for successive measurements of discrete as well as continuous observables *M D Srinivas* 259–277

General Relativity and Gravitation

Nonsingular cosmological models: the massive scalar field case *B S Sathyaprakash and K P Sinha* 15–27

The trousers problem revisited *Corinne A Manogue, Ed Copeland and Tevian Dray* 279–292

Circular orbits of an electron around a proton in Schwarzschild geometry *D K Chakraborty* 371–374

Statistical Physics

Use of Padé approximants in the evaluation of α and δ for one-dimensional maps *G Ambika and K M Valsamma* 501–510

Particle Physics

Gribov-Lipatov inequality and inclusive e^+e^- processes *D K Choudhury and A K Misra* 35–42

Superconformal transformations of the $N = 4$ supersymmetric Yang-Mills theory *Mayank R Mehta* 87–91

The one-loop Green's functions of dimensionally reduced gauge theories *S V Ketov and Y S Prager* 173–182

Baryon masses in the SU(4) Skyrme model *M S Sriram and S Lakshmibala* 293–297

The superconformal anomaly in the $1 + 1$ dimensional Wess-Zumino model *S G Kamath* 299–304

Spin and mass content of linearized Poincaré gauge theories
Eric A Lord and K P Sinha 511–519

Nuclear Physics

Characterization of energy levels in the nucleus ^{170}Lu
P C Sood, R K Sheline and R W Hoff 93–104

Use of threshold activation technique in estimating energy distributions of accelerator produced neutrons *B K Khasnabis, Tapas Bandyopadhyay, P K Sarkar and G Muthukrishnan* 105–114

Off-shell behaviour of $^{32}S(n,n)^{32}S$ total cross-section and $^{32}S(d,p)^{33}S$ reaction to the continuum *Rama Shyam* 115–127

Effect of the three-body force on trinucleon bound systems considering S and S'-state admixture *Tushar Baran De and Tapan Kumar Das* 183–192

Measurement and analysis of alpha-induced reactions on Ta, Ag and Co
M Ismail and A S Divatia 193–210

A note on the mean-internucleon distance in the central region of heavy nuclei *Nazakat Ullah* 305–307

Non-statistical structures in $^{12}C(^{15}N, ^{4}He)^{23}Na$ reaction *R Singh* 375–385

Atomic and Molecular Physics

Conformational analysis of allyl halides from the calculation of indirect spin-spin coupling *V Santhanam, J Sobhanadri and S Subramaniam* 43–50

Intensity distribution in the bands of the $B1 \rightarrow X^1\Sigma^+$ system of PbO
N Rajamanickam 51–58

Infrared and Raman spectra of aquamolybdenum (VI) oxide hydrate ($MoO_3 \cdot 2H_2O$) *Daizy Philip, G Aruldhas and V Ramakrishnan* 129–133

Photoacoustic spectra of some laser dyes *R S Ram and Om Prakash* 135–141

Determination of excited state electric dipole moment of the isomeric fluorophenylisocyanates from solvatochromic shift measurements
N H Ayachit, A M Huralikoppi, K Suryanarayana Rao and M A Shashidhar 211–215

Vibrational spectra of 2, 3 and 2, 6 dichloro anilines
R P Singh and R N Singh 217–223

On the non-Boltzmann A-X emission in Na_2 following laser excitation of the B state *A Sharma, G L Bhale, M A N Razvi and M N Dixit* 309–317

The minimax technique in relativistic Hartree-Fock calculations
S N Datta and G Devaiah 387–405

Post-collision interaction effects on the triple-differential cross-section for the ionization of helium by fast positrons
Sadhana Sharma and M K Srivastava 521–525

Non-thermal rotational and vibrational excitation of CN produced in the flash photolysis of thiazole
R Venkatasubramanian and S LN G Krishnamachari 529–533

Plasma Physics

Voltage current and power relation in an arc plasma in a variable axial magnetic field *S N Sen and M Gantait* 143–151

Double layers in a field-aligned current driven plasma
S Sutradhar Das and S Bujarbarua 535–541

Experimental Techniques and Instrumentation

A simple apparatus for the measurement of thermoelectric power in the temperature range 4·2–300 K *K P Rajeev and N Y Vasanthacharya* 29–33

Frequency tunability and temporal characteristics of a DAMC distributed feedback dye laser *P K Palanisamy, A Ramalingam, V Masilamani and B M Sivaram* 543–548

A simple technique for laser-induced ablation pressure measurement
T S Shirsat, N S Shikharkhane and H C Pant 549–555

On multiple small-angle scattering *S Mazumder and A Sequeira* 557–568

Optics

An age-dependent model of cavity radiation and its detection II. Anti-bunched and thermal characteristics *S K Srinivasan* 59–70

Condensed Matter Physics

A high pressure Raman study of ThO_2 to 40 GPa and pressure-induced phase transition from fluorite structure
A Jayaraman, G A Kourouklis and LG Van Uitert 225–231

Electronic structure and bonding in NaLi, LiMg and LiAl alloys: a $Ms X_\alpha$ SCF approach *P K Khowash* 233–237

Transfer of charge in liquid alloys
Arun Pratap, Meeta Rani and N S Saxena 239–244

Optimization of deconvolution in Compton profile measurements
V K Agrawal and B P Singh 245–249

Effects of lattice dispersion and elastic anisotropy on the thermal properties of bcc metals *Meenakshi Mohapatra and S Tolpadi* 319–329

Temperature variation of the Debye-Waller factors of metal and halide ions in CsCl and CsBr powders by X-ray diffraction I. Debye-Waller factors of Cs^+ and Cl^- ions in CsCl from room temperature to 90° K
V Ganesan and K S Girirajan 331–336

Temperature variation of the Debye-Waller factors of metal and halide ions in CsCl and CsBr powders by X-ray diffraction II. Debye-Waller factors of Cs^+ and Br^- ions in CsBr from room temperature to 78·2° K *V Ganesan and K S Girirajan* 337–340

Temperature variation of the Debye-Waller factors of metal and halide ions in CsCl-Br solid solutions between room temperature and 90° K by powder X-ray diffraction *V Ganesan and K S Girirajan* 407–417

Specific heat of $YBa_2Cu_3O_{7-x}$ from 4·2 to 60 K *N Sankar, V Sankaranarayanan, R Srinivasan, G Rangarajan and G V Subba Rao* 419–421

Lattice dynamics of $MgSiO_3$ perovskite *Narayani Choudhury, S L Chaplot, K R Rao and Subrata Ghose* 423–428

Threshold pump strain for parametric amplification in *n*-indium antimonide *R Y Thakur, B K Singh and R D Roy* 429–433

Mass enchancement factor for Pd and Pt *A K Bordoloi and S Auluck* 435–442

Measurement and understanding of magnetization in AC and DC fields and the determination of intragrain H_{c1} in high T_c $RBa_2Cu_3O_7$ superconductors *A K Grover, C Radhakrishnamurthy, P Chaddah, G Ravi Kumar and G V Subba Rao* 569–595

Rapid Communications

Possible observation of superconductivity at 300 K *Ram P Gupta, W S Khokle, G S Virdi, B S Pathak, B Jayaram, R C Dubey, S K Agarwal and A V Narlikar* L71–L74

On the addition of silver to high T_c($Y_1Ba_2Cu_3O_{7-x}$) superconductor *R G Sharma, Y S Reddy, S R Jha, K D Kundra and D K Suri* L75–L80

Critical current in silver clad Y-Ba-Cu-O superconducting wires *R G Sharma, Y S Reddy, S R Jha and S S Dubey* L81–L86

Normal-phase transport properties of high T_c Y-Ba-Cu-O compounds *C M Srivastava, S N Bhatia, Om Prakash, N Venkataramani and R Walia* L153–L160

Positron annihilation measurements across the superconducting transition in $Y_1Ba_2Cu_3O_{7-x}$ *C S Sundar, A K Sood, A Bharathi and Y Hariharan* L161–L165

Anomalous magnetic hysteresis loops and small H_{c1} values in high T_c superconductors *A K Grover, C Radhakrishnamurty, P Chaddah, G Ravi Kumar and G V Subba Rao* L167–L171

Influence of powder processing procedure on the superconducting behaviour of $YBa_2Cu_3O_{7-y}$ ceramics *Dhanajai Pandey, V S Tiwari, A K Singh and Sangeeta Chaudhry* L251–L254

Effect of phase fluctuation on a system of rotating superfluid *A C Biswas* L255–L257

On the preparation and the characterization of superconducting thin films of $YBa_2Cu_3O_{7-x}$ *S K Gupta, V R Katti, D P Gandhi, S C Gadkari, S C Sabharwal, K K Gupta, A K Rajarajan, L C Gupta and R Vijayaraghavan* L341–L344

On the pairing interaction in high T_c superconductors *P Chaddah* L345–L346

X-ray diffraction from single Al_6 $CuLi_3$ grains showing five-fold symmetry
V Sasisekharan, S Baranidharan, E S R Gopal, M Sundaramoorthy and J A Sekhar L347–L353

$YBa_2Cu_3O_{7-y}$ composites for improved fabricability
N C Soni, Ram Prasad, Ashok Mohan, C K Gupta, C V Tomy and S K Malik L355–L358

High-temperature superconductivity in bismuth-copper oxides of the type $Bi_mM_nCu_pO_x$ (M = Mg, Ca, Sr, Ba, Bi) *C N R Rao, A M Umarji, R A Mohan Ram, R Vijayaraghavan, K S Nanjunda Swamy, P Somasundaram and L Ganapathi* L359–L366

Specific heat anomaly in the 90 K superconductor $HoBa_2Cu_3O_{7-y}$
B K Basu, S M Pattalwar, R N Dixit, S Y Shete, A K Rajarajan, L C Gupta and R Vijayaraghavan L367–L370

Oxygen stability in $YBa_2Cu_3O_{7-x}$ *S B Ota, L Varshney, T V Chandrasekhar Rao and V C Sahni* L443–L447

Superconducting Y-Ba-Cu-O thin films by RF sputtering
K Solomon Harshavardhan L449–L453

Effect of Zr, Ti substitutions on T_c in superconducting $YBa_2Cu_3O_{7-\delta}$ system *N Venkataramani, K Muraleedharan, A Datta, S N Bhatia, Om Prakash and C M Srivastava* L455–L457

Length-independent voltage fluctuations in small conductors
A M Jayannavar L459–L462

Monitoring of thin layer deposits of high temperature superconducting materials by energy-dispersive X-ray fluorescence technique (EDXRF)
Madan Lal and R K Choudhury L463–L467

High temperature superconductivity in bismuth-alkaline earth-copper-oxygen system *I K Gopalakrishnan, P V P S S Sastry, K Gangadharan, J V Yakhmi, G M Phatak and R M Iyer* L469–L471

High temperature superconductivity in Bi-Sr-Ca-Cu-O oxide system
C V Tomy, S K Malik, Ram Prasad and N C Soni L473–L476

Superconductivity in $Bi_{2\cdot2}Ca_{2\cdot8-x}Sr_xCu_2O_y$ system and effect of rare earth substitution *Ram Prasad, N C Soni, A Gulnar, C V Tomy, D T Adroja and S K Malik* L477–L481

Superconductivity in the 100–120 K region in oxides of the Tl-Ca-Ba-Cu-O system *A K Ganguli, G N Subbanna, A M Umarji, S V Bhat and C N R Rao* L483–L490

A biaxial nematic liquid crystal *S Chandrasekhar, B K Sadashiva, B R Ratna and V N Raja* L491–L494

Indications of superconductivity in the 200–300 K range in the Bi-Ca-Sr-Cu-O system *C N R Rao, R A Mohan Ram, L Ganapathi and R Vijayaraghavan* L495–L499

Orthorhombic structure: a necessity in superconducting 1-2-3 compounds *R Prakash, O Prakash and N S Tavare* L597–L600
